Fall-to-fall retention data presented in this table include all full-time students enrolling during the fall semester. For each student sub-population, the table indicates the percentage of those students who graduated prior to the following fall semester, the percentage of students returning (“Retained”) the following fall semester, and the percentage of students who neither graduated prior to nor returned during the following fall semester.

This table presents credential completion data for first-time, full-time, fall semester student cohorts going back to fall 2015. Data for each student sub-population are broken down by students who graduated in 150%-time or less (3 semesters for a one-year certificate, 3 years for an associate degree, and 6 years for a bachelor’s degree), students who needed more than 150%-time to graduate, and students who have not yet graduated.

The preceding table shows the percentage of incoming students (first-time, full-time fall cohort) who complete ANC's gateway mathematics course, College Algebra (M 121) in their first year of study. The table also shows the percentage of students who attempted but did not complete the course, as well as the percentage of students who did not attempt the course during their first year.

Like the previous table, data for this table include first-time, full-time students enrolling in the fall semester for each of the past seven years. For each of those years, the table shows the percentage of students who completed the college's gateway writing course, College Writing I (WRIT 101), in their first year, the percentage of students who did not attempt College Writing I in their first year, and the percentage of students who attempted but did not successfully complete College Writing I in their first year.
